From front and back doors to side doors you'll be spoilt for choice with our range of contemporary and traditional double and triple glazed doors. Choose from uPVC, timber, aluminium, or composite materials depending on your requirements and budget.

Our range of high-performance doors are available in a range of RAL colours with a choice of door accessories including door knockers, handles and letterboxes and are security tested to PAS 24 and to meet the requirements of Secured by Design and Part Q.

Whether you are looking for obscure glass designs, fusion glass designs, coloured glass, leaded glass or etched glass you are sure to find something in our extensive selection.

It is a great idea to involve us in your design process as early as you can – we have expert designers who can give great impartial advice and help you to come up with a fantastic solution at the best possible price!

HALO

NAME Halo
 PRODUCT uPVC Entrance Doors
 DESCRIPTION

Halo entrance doors are high quality and cost-effective uPVC doors. These doors combine functionality with visually appealing traditional and contemporary designs.

INTENDED USE These doors can be gloss white or have a woodgrain effect finish in a choice of 14 different colours. There are 17 different designs as standard, but these can all be tweaked in multiple ways giving maximum versatility. Curved panel designs are NOT available. These doors are also typically used for rear entrance doors, including French Doors.

APEER

NAME Apeer
 PRODUCT Composite Entrance Doors
 DESCRIPTION

The Apeer 70 is the only triple glazed and most secure composite door on the market. The glazed units are 48mm thick instead of the normal 24mm or 28mm double glazed units, giving a centre pane u-value of only 0.7, achieving an A rating for energy efficiency. The door itself is also 70mm depth – much thicker than the standard 44mm of most other composite doors.

INTENDED USE Available in 67 different door styles with 27 different colours, this is a great choice for homes who are looking for the best possible entrance door to complement their PVC windows. The Apeer door is THE best composite door on the British market.

EVOLUTION

NAME The English Door Company, by Evolution
 PRODUCT Timber Alternative Entrance Doors
 DESCRIPTION

Evolution's award-winning bespoke timber-effect front doors are handcrafted in the UK by the finest craftsmen who combine traditional methods with the very best of modern technologies. Evolution's timber-look entrance doors are highly durable, require very little maintenance, have excellent thermal and sound proofing and are fitted with a multi-point locking system

INTENDED USE These doors were developed alongside the award-winning Evolution Windows to give all the look of a timber door but without the maintenance. Features like true Timber-Look Joints on the door sash and frame set these doors apart from anything else in its class. 40 door designs and 14 colour options including contemporary colours gives plenty of choice to find the perfect design to suit your home.

TIMBER

NAME Thames Valley Windows Timber
 PRODUCT Wooden Entrance Doors
 DESCRIPTION

Crafted using traditional methods, our bespoke factory finished engineered timber front doors benefit from classic aesthetics and modern-day technology, exceptional levels of security and energy efficiency. Every timber front door can be specified in Redwood, Hardwood or European Oak. We only use defect-free, certified wood, which offers maximum protection against twisting and warping and prevent resin exudation.

INTENDED USE Despite the qualities of all the other doors featured here, for a certain type of project, nothing can match the elegance of a real timber door. There are 16 standard designs, but in truth timber gives us the ultimate versatility to design the door the way you want it – plus there are limitless colour options, including the Farrow & Ball range for those customers who want the ultimate Traditional Door!

HERITAGE 47

NAME Heritage 47
 PRODUCT Aluminium Entrance Doors
 DESCRIPTION

Our Heritage 47 aluminium entrance doors have been carefully designed to closely replicate the proportions and detail of an original CrittalL frame. With a minimal 58mm outer frame and casement measurement, they have the slimmest proportions on the market.

INTENDED USE Perfect for contemporary extensions which want to have a nod to the past. This style is very popular in London when going for that 'Engineered' look as well. However, our Heritage 47 doors are also suitable for conservation areas and in listed buildings, subject to relevant approvals where necessary

KF410

NAME KF410
 PRODUCT uPVC/Aluminium Entrance Doors
 DESCRIPTION

KF 410 uPVC-aluminium doors features Internorm I-tec technology the narrow square-edged, flush transition of the frame and sash combines KF410 to one unit that can also be rendered on three sides into the reveal. Which means only a slim, square-edged frame of the sash remains exposed creating a minimalistic aesthetic.

INTENDED USE With its Passivhaus credentials, the KF410 doors are intended to be paired with the matching windows in the Internorm range as rear doors and French Doors. The doors can feature a tilt and turn option which can be very useful for ventilating rooms where there are no other windows.

HF410

NAME HF410
 PRODUCT Timber /Aluminium Entrance Doors
 DESCRIPTION

The HF 410 features the I-tec core — a laminated timber core and solid hardwood exterior providing strength, durability and adaptability. This revolutionary technique allows the use of timbers not usually used for timber/aluminium windows. Available in a range of wood finishes including Oak, Ash, Larch, Walnut and, for a vintage look, a new Grey Oak is now available.

INTENDED USE The HF410 range has all the features already seen in the KF410 (including the Passivhaus insulation benefits), but this time with the beauty of timber internally which will give a real ‘Wow’ Factor to any project.

About Us

Thames Valley Window Company has traded successfully since October 1984. The two founders, Paul & Mark Schofield, are still actively involved and continually ensure that we keep ahead in Product Development & Architectural Design.

It is our responsibility to give you a professional design service as well as a product range that will be in keeping with the style and age of your property and enhance the value of your home.

Survey

This is a most vital part of your project and often underestimated in our industry. A precision survey means that the installers enjoy their work and the windows and doors fit your brick openings with minimal sealants and trims, giving you the perfect finish. This is especially important on large units where a lack of attention to detail at this stage can create serious issues once the product is installed.

Installation

We understand that having done all the preparation, the installation, finishing detail and completion of your project is the most important stage of all. This will be taken care of by one of our own teams of highly trained and experienced craftsmen. We have a very low turnover of staff, meaning that each member of our team understands our philosophy of delivering excellence. We have specialist teams responsible for installing our premium products like air so you know you're in safe hands every time.

After Sales Service

We have a dedicated After Sales Department running full time Service Engineers with a computerised record of every window and door that we have ever installed, dating back to 1984. This ensures we can identify, replace or repair any item.

The reason we are still going from strength to strength is that we look after our customers. More than 50% of our work comes from people recommending us or returning for additional work. We are also the highest rated window installer on the independent review site, Trustpilot.

We can promise you will be delighted with every aspect of the process and we look forward to being of service to you.

TRUSTPILOT

We pride ourselves on delivering exceptional service at all times to our customers. Trustpilot is an online community where our customers have the opportunity to review the service we provide. We consistently achieve an 'Excellent' rating.

CHAS

We have achieved, CHAS accreditation proving our dedication to setting the highest of standards for health and safety within the construction industry.

FENSA

Fensa provide certification to confirm that your windows and doors have been installed to the relevant building regulation controls. The self-certification scheme means that you do not have to arrange this with the local authority, this also ensures that minimum standards are met by the installation company.

ISO 9001

For the supply and installation of Conservatories, Windows, Doors, Roof Lanterns and Roofline products. Being frequently audited, we continue to achieve ISO9001 meaning that we have shown that we are focused on exceeding customer expectations and delivering excellence EVERY time.

THE BRITISH STANDARDS INSTITUTION

We have achieved the unique BSi accreditation for the Quality Survey & Installation of Windows & Doors and are frequently audited, giving our customers peace of mind that they will receive the best service throughout the project.

THE GLASS AND GLAZING FEDERATION

We are proud long-standing members of the Glass & Glazing Federation (GGF), with strict qualifying criteria we are delighted to uphold the highest standards in the industry. As well as offering an array of benefits such as insurance backed guarantees and warranty underwriting for its members, the GGF guides and protects homeowners when buying glass or glazing products and service.
