Bifolding doors are often one of the most important elements of the glazing package for any project. The ability to give a 90% opening is the major benefit over sliding doors. With the doors stacked to one end, the opening really does open up to the outside and will often give the 'WOW' factor.

Here at TVW we have innovative design options to suit every project and budget from European leading manufacturer Solarlux.

Solarlux designs and manufactures their own system, in their Melle factory in Western Germany meaning that every door they produce has been considered for its functionality and manufactured for its sole purpose.

Every single door goes through the same manufacturing procedure. Therefore, all of their certification and CE marking can be attributed to all of their products without question.

Solarlux doors achieve the highest level of testing and certification attainable in terms of product performance, security and weather resistance. They are regarded as being the most exceptional quality Bifold doors available to buy.

It is a great idea to involve us in your design process as early as you can – we have expert designers who can give great impartial advice and help you to come up with a fantastic solution at the best possible price!

## COMBILINE

**NAME** Combiline  
**PRODUCT** Timber/Aluminium Bifolding Doors  
**DESCRIPTION**

Combiline Timber/Aluminium Bi-Folding Door are available in Meranti, Spruce, Oak and Pine and will add warmth and character to your home.

**INTENDED USE** With a composite construction of Aluminium externally and Timber internally, these doors give the best of both worlds – no ongoing maintenance externally with the Aluminium, but the beauty of Timber on the inside. Especially worth considering if you are having composite windows elsewhere – eg Internorm or Rationel.

## About Us

Thames Valley Window Company has traded successfully since October 1984. The two founders, Paul & Mark Schofield, are still actively involved and continually ensure that we keep ahead in Product Development & Architectural Design.

It is our responsibility to give you a professional design service as well as a product range that will be in keeping with the style and age of your property and enhance the value of your home.

### Survey

This is a most vital part of your project and often underestimated in our industry. A precision survey means that the installers enjoy their work and the windows and doors fit your brick openings with minimal sealants and trims, giving you the perfect finish. This is especially important on large units where a lack of attention to detail at this stage can create serious issues once the product is installed.

### Installation

We understand that having done all the preparation, the installation, finishing detail and completion of your project is the most important stage of all. This will be taken care of by one of our own teams of highly trained and experienced craftsmen. We have a very low turnover of staff, meaning that each member of our team understands our philosophy of delivering excellence. We have specialist teams responsible for installing our premium products like air so you know you're in safe hands every time.

### After Sales Service

We have a dedicated After Sales Department running full time Service Engineers with a computerised record of every window and door that we have ever installed, dating back to 1984. This ensures we can identify, replace or repair any item.

The reason we are still going from strength to strength is that we look after our customers. More than 50% of our work comes from people recommending us or returning for additional work. We are also the highest rated window installer on the independent review site, Trustpilot.

We can promise you will be delighted with every aspect of the process and we look forward to being of service to you.

#### TRUSTPILOT

We pride ourselves on delivering exceptional service at all times to our customers. Trustpilot is an online community where our customers have the opportunity to review the service we provide. We consistently achieve an 'Excellent' rating.

#### CHAS

We have achieved, CHAS accreditation proving our dedication to setting the highest of standards for health and safety within the construction industry.

#### FENSA

Fensa provide certification to confirm that your windows and doors have been installed to the relevant building regulation controls. The self-certification scheme means that you do not have to arrange this with the local authority, this also ensures that minimum standards are met by the installation company.

#### ISO 9001

For the supply and installation of Conservatories, Windows, Doors, Roof Lanterns and Roofline products. Being frequently audited, we continue to achieve ISO9001 meaning that we have shown that we are focussed on exceeding customer expectations and delivering excellence EVERY time.

#### THE BRITISH STANDARDS INSTITUTION

We have achieved the unique BSi accreditation for the Quality Survey & Installation of Windows & Doors and are frequently audited, giving our customers peace of mind that they will receive the best service throughout the project.

#### THE GLASS AND GLAZING FEDERATION

We are proud long-standing members of the Glass & Glazing Federation (GGF), with strict qualifying criteria we are delighted to uphold the highest standards in the industry. As well as offering an array of benefits such as insurance backed guarantees and warranty underwriting for its members, the GGF guides and protects homeowners when buying glass or glazing products and service.
