the
SLIDING
SASH

Exquisite, timeless, lovingly crafted and a pleasure to use.

ARCHITECTURE SHOULD SPEAK OF ITS TIME AND PLACE, BUT YEARN FOR TIMELESSNESS

Our factory finished engineered timber sliding sash windows sympathetically replicate the finer details of a period sash window, whilst benefiting from modern day security features, thermal and acoustic performance.

They will add charm, character and authenticity to your home. Made to measure, they can replace original sash windows in older style properties, or create a traditional appearance in new builds.

the
FLUSH
CASEMENT

*Typical in many late Georgian, Victorian
and Edwardian properties, the timber flush casement
was the design choice of the 19th century.*

FASHION IS ARCHITECTURE: IT IS A MATTER OF PROPORTION

The opening sash sits flush within the window frame, creating a flat surface on the outside. Due to the simple, clean appearance, the flush casement is as popular as ever today and can look stunning in both traditional and modern properties.

Available in double or triple glazing, Georgian bar, leaded or clear glass designs, colour finishes, opening configurations and window furniture, the possibilities are endless.

our
TIMBER
DOORS

You can see and feel the difference with a timber door.

THE DIFFERENCE BETWEEN STYLE AND FASHION IS QUALITY

A thing of beauty. Crafted using traditional methods, our bespoke factory finished engineered timber doors benefit from traditional aesthetics and modern-day technology, security and energy efficiency.

Front door, French doors or bi-folding doors, with timber, the possibilities are endless. The results speak for themselves. Reassuringly solid, beautiful doors that will last a lifetime.
